

Kristopher James Wong

Senior Product Leader | AI Enablement & Agentic Workflows | Microsoft Cloud Ecosystem

Ottawa, ON, Canada | (613) 866-9764 | kristopher.j.wong@gmail.com | kristopherwong.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Product leader with 15+ years in the Microsoft cloud ecosystem — Azure, M365, and the CSP partner channel — and a daily, hands-on AI engineering practice built on Claude Code, MCP, and agentic workflows. As Product Director at Surveil, took Navigator from ambiguous concept to a SaaS platform governing **280,000+ enterprise tenants** across 50+ distributors and MSPs, working directly with the CEO and founders on company-level product decisions. Stood up Surveil's internal AI enablement in parallel: Claude Code skills, plugins, and deterministic pipelines that product and design teams now use daily, supported by recurring training and show-and-tell sessions. Co-author of four FinOps Foundation publications on SaaS cost management and Microsoft licensing. Deliberately pursuing senior IC product work — deep building and company-level influence over people management.

SKILLS

AI-Native Product Practice: Claude Code (daily driver), Model Context Protocol (MCP), agent-based workflows, retrieval-augmented generation (RAG), prompt & context engineering, copilots (M365 Copilot, Copilot Studio), Figma Make / Claude Design, Azure AI Foundry, AWS Bedrock, responsible AI, AI training & enablement delivery

Product Strategy & Execution: Research-driven discovery, rapid prototyping & experimentation, PRDs and requirements authoring, Shape Up, outcome-based OKRs and success metrics, enterprise roadmap ownership, category creation, commercial & contract modeling

Microsoft Cloud Ecosystem: Azure, Microsoft 365, Cloud Solution Provider (CSP) / Indirect Provider motion, Microsoft Partner Center API, GDAP orchestration, EA / MCA / CSP licensing, Windows 365 & Azure Virtual Desktop licensing and cost economics, Intune entitlements, multi-tenant governance at 280K+ scale

FinOps & Cost Optimization: FinOps Foundation co-author, Azure cost management, RI / Savings Plan optimization, SaaS FinOps, licensing rationalization, zombie workload identification

Executive & Cross-Functional Leadership: CEO/founder partnership, C-suite and board communication, influence across engineering, design, and GTM without formal authority, NA / EMEA partner enablement, training program design and delivery

EXPERIENCE

Product Director, Navigator | Surveil

Feb 2023 – Present

Own product strategy and the enterprise roadmap at Surveil (Microsoft-ecosystem ISV) for **Navigator** — a Revenue Intelligence platform that helps distributors, resellers, and MSPs monetize their Microsoft customer estates. Work directly with the CEO and founders on company-level product decisions; lead the product management team and influence engineering, design, and NA/EMEA GTM without formal authority.

AI Enablement & Agentic Product Strategy

- Built Surveil's internal AI enablement for product and design teams: Claude Code skills, plugins, and deterministic pipelines for opportunity briefs, meeting-minutes-to-feature-request translation (second-brain memory architecture), UI/UX prototyping, spec and PRD generation, and documentation — turning ad-hoc AI use into repeatable team workflows.
- Run the adoption side as well as the tooling: small-group training sessions plus company-wide show-and-tell demos, each grounded in a live problem a peer, direct report, or executive brought in.
- Drove the strategic decision to evolve Navigator toward a headless product surface with MCP support, positioning the platform so AI agents — not just human users — can operate it directly.
- Developed a context-engineering prototyping method (design, engineering, product, strategy, and business context files plus breadboarding) that produces high-fidelity, partner-demoable prototypes which hand off cleanly to designers inside the design system — adopted after hands-on evaluation of Figma Make and Claude Design against B2B design-system guardrail needs.
- Leading an **NLP-driven campaign builder** (in beta) that collapses a 16-field configuration task into a natural-language conversation backed by RAG over the 280K-tenant dataset, built on Azure AI Foundry.

Roadmap Ownership & Category Creation

- Own the multi-year roadmap and positioning for the **Partner Sales Intelligence** category — codified a phased framework (Deep Microsoft → Platform Foundation → Multi-Vendor) and a See It / Find It / Do It / Scale It / Prove It methodology now adopted across 50+ partner organizations.
- Authored Navigator's vision, executive strategy decks, PRDs, commercial models, EULA, and contract structures; designed a Partner Activation Ladder (L0–L4) tying product leading indicators to enterprise sales outcomes and quarterly executive phase-gate reviews.
- Designed and shipped a proprietary recommendation layer across Surveil's M365 and Azure products that outperforms Microsoft Advisor by grounding guidance in deterministic, factual evidence chains — covering M365 license usage measurement, RI / Savings Plan purchase strategy, and Azure zombie workload identification.

Scale, GTM & Outcomes

- Scaled Navigator from concept to production governing **280,000+ enterprise tenants** across 50+ partners, including several of the world's largest Microsoft Indirect Providers; grew paying end customers from ~800 to 2,200+ and MAU from 0 to ~800.
- Surfaced **\$5M+ in identified and realized partner revenue** through Navigator intelligence; shipped Bulk Onboarding, Wallet Share Analysis, PEC Reconciliation, Azure/M365 Takeover Modeling, and a GDAP orchestration method that cut downstream partner onboarding from days to minutes.
- Lead GTM strategy with regional executive leads across NA and EMEA; engage partner C-suites on roadmap alignment and joint enablement.

Senior Client Success Manager | MetrixData 360

Feb 2021 – Feb 2023

Led the enterprise delivery organization for SAM, FinOps, and Azure managed services; owned the FinOps and Azure cost-optimization practice and managed three delivery consultants.

- Originated the firm's first FinOps Managed Service, growing managed-service ARR from ~\$500K to **\$2.4M+ annually (~380%)** over two years across recurring FinOps, SAM, and Azure cost-optimization lines.
- Owned the internal product roadmap for Synapse (delivery platform) and client-facing FinOps reporting; engaged CIO / CFO / VP-IT stakeholders on M365 and Azure Proof-of-Value campaigns that fed qualified pipeline into the new managed-service motion.

Software Optimization / Licensing Manager | Long View Systems

Nov 2017 – Feb 2021

Productized Long View's SAM consulting practice into **Sync Up**, a managed service scaling from MVP to a recurring revenue line generating \$500K+ annually.

- Owned the Sync Up roadmap and built reusable tools, templates, and delivery playbooks that scaled enterprise SAM delivery from SMB to Fortune-class accounts without proportional headcount growth.
- Authored 25+ Licensing Briefs used by 50+ sellers and account executives; led tier-1 publisher negotiations and audit defense engagements that **averted \$50M+ in potential audit fines** within the first 12 months.
- Delivered SAM workshops at *ITAM Review* and *IAITAM* international conferences.

Software Asset Management Consultant | Beaconize Inc.

Jan 2016 – Nov 2017

- Led an Oracle RDBMS audit defense for a multinational enterprise, delivering **\$15M+ in liability savings**, and an IBM audit engagement for a major financial institution that reduced audit-fine exposure by \$20M+.
- Advised CIO / VP-IT leadership on architecture decisions carrying material licensing exposure and led enterprise license negotiations on clients' behalf.

IT Asset Management Lead | RAPA Consulting

May 2015 – Jan 2016

- Authored an end-to-end enterprise SAM lifecycle methodology synthesizing ISO 19770-1, Microsoft Operations Framework, and IAITAM practices — adopted as the firm's baseline delivery framework across 5+ enterprise engagements.

Program Manager / Business Analyst | Canadian Medical Association — PMO

Apr 2014 – May 2015

- Led a full-operations enterprise program review across CMA's business portfolio; the resulting executive recommendations directly informed the divestiture of MD Financial Management — **sold to Scotiabank in 2018 for \$2.585 billion**, one of the largest not-for-profit divestitures in Canadian history.
- Designed and launched CMA's enhanced enterprise PMO from the ground up: 20+ templates, governance model, and intake/prioritization process anchoring the transformation program.

IT Business Relationship Manager / Service Owner | General Dynamics Canada & C4S

Sep 2010 – Apr 2014

- Owned \$5–7M per year of enterprise IT investment; as Service Owner, led a cross-functional team of five governing **~\$80M annually** in software assets, negotiating with tier-1 publishers and leading internal and external audits.
- Delivered \$3.5M+ year-over-year savings in infrastructure software maintenance and produced the CapEx / OpEx analysis informing executive investment decisions.

Business Analyst | Alcatel-Lucent Canada

Jul 2009 – Sep 2010

- Coordinated supplier data standards across 500+ EMS / OEM vendors and migrated 3M+ proprietary supplier records into a unified data warehouse against Telcordia standards.

EDUCATION

Bachelor of Commerce (BComm) — Telfer School of Management, University of Ottawa, 2012
